

September 2024 dam report

I spoke with Joe from Kiley. DEP has not yet reviewed the hydrologic study. DEP is severely backlogged and understaffed. They told Joe that our dam, based on its classification, is a low priority. It could be several years before they review the repair plans. DEP is working on hiring new people to fill the empty positions. This really is to our benefit as it allows us more time to accumulate more reserve funds for when the repairs are approved.

Annual inspection will be performed between now and end of October.
